

## Erasmus Mundus

The Erasmus Mundus programme launched in 2004 by the European Commission is a co-operation and mobility programme in the field of higher education which promotes the European Union as a centre of excellence in learning around the world. It supports European top-quality Masters Courses and enhances the visibility and attractiveness of European higher education in third countries. It also provides EU-funded scholarships for third country (Outside of EU) nationals participating in these Masters Courses, as well as scholarships for EU-nationals studying in third countries.

By supporting the international mobility of scholars and students, Erasmus Mundus intends to prepare its European and non-European participants for life in a global, knowledge-based society. The programme, a new global approach, is intended to strengthen European co-operation and international links in higher education by supporting high-quality European Masters Courses, by enabling students and visiting scholars from around the world to engage in postgraduate studies at European universities, as well as by encouraging the outgoing mobility of European students and scholars towards third countries (Out of EU countries).

Erasmus Mundus Masters Courses and scholarships will provide a framework to promote valuable exchange and dialogue between cultures.

- Details about the Erasmus Mundus programme can be found at:  
[http://europa.eu.int/comm/education/programmes/mundus/index\\_en.html](http://europa.eu.int/comm/education/programmes/mundus/index_en.html)

## Scholarships

According to the Erasmus Mundus rules, Euroa Aquae consortium offers every year about 25 scholarships for non-European participants. 2 years grants of 42,000 Euros are proposed after selection of candidates by the EuroAqua consortium and validation by the European Commission. The programme is also open to candidates who do not request financial support through Erasmus Mundus programme.

# Hydroinformatics and water management

## Master programme structure

### Core Modules (semester 1 & 2)

### Specialization modules (semester 3)

### Admission criteria

Admission criteria for the Master programme in Hydroinformatics and Water Management. The programme is designed for students with a Bachelor's degree in a related field, such as Civil Engineering, Environmental Engineering, or Mechanical Engineering. The admission process involves a review of the applicant's academic records and a selection interview. The programme is offered in English and is suitable for international students. The duration of the programme is 24 months, divided into four semesters. The first two semesters focus on core modules, while the last two semesters focus on specialization modules. The programme is accredited by the relevant authorities in Germany and Spain.
